

Augmented Reality Object Tracking — fast & accurate with VisionLib Model Tracking.

VisionLib enables enterprise-grade object tracking for a variety of industrial augmented reality applications.

Test & explore VisionLib's tracking without being a developer — with our demo tracking app and this do-it-yourself tracking target.

This is a paper-craft substitute for our ceramic cup, one of our trade show giveaways. Cut-out, fold and glue it to create a cylindrical demo object.

The crafting result should look like this.

visionlib.com/demo
